

Introduction

Acube is a fast-growing real estate development company with a powerful presence in Dubai. We offer clients an array of modern construction and development solutions for residential and commercial buildings. With deep rooted understanding of Dubai's real estate market, we help investors propel their investments by priming them for early success.

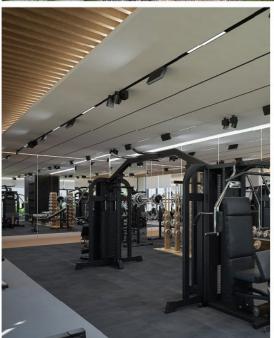

About the Project

Acube has chosen to name our projects based on various stars, some of the brightest shining objects in our night sky and always been a path finder for human race.

This first project is called Adhara Star, a modern and extremely well-designed residential & retail project named after a bright star called Adhara in the northern hemisphere constellation Canis Major. It is the brightest source of ultraviolet light in the entire known universe when seen from Earth. In that band of light, this bluish-white star is about 22,300 times more luminous than our Sun.

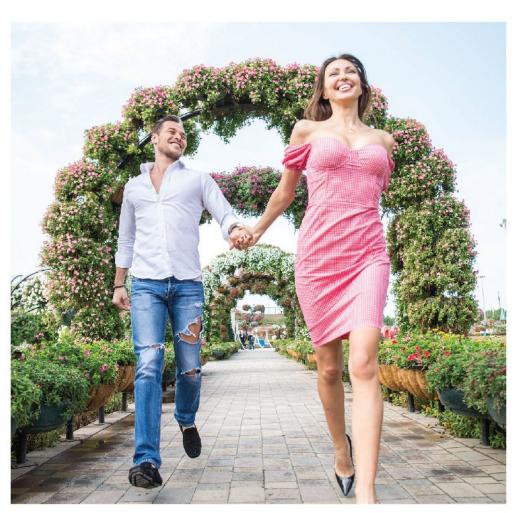

Freehold mixed-use development

Fully designed and developed by Acube

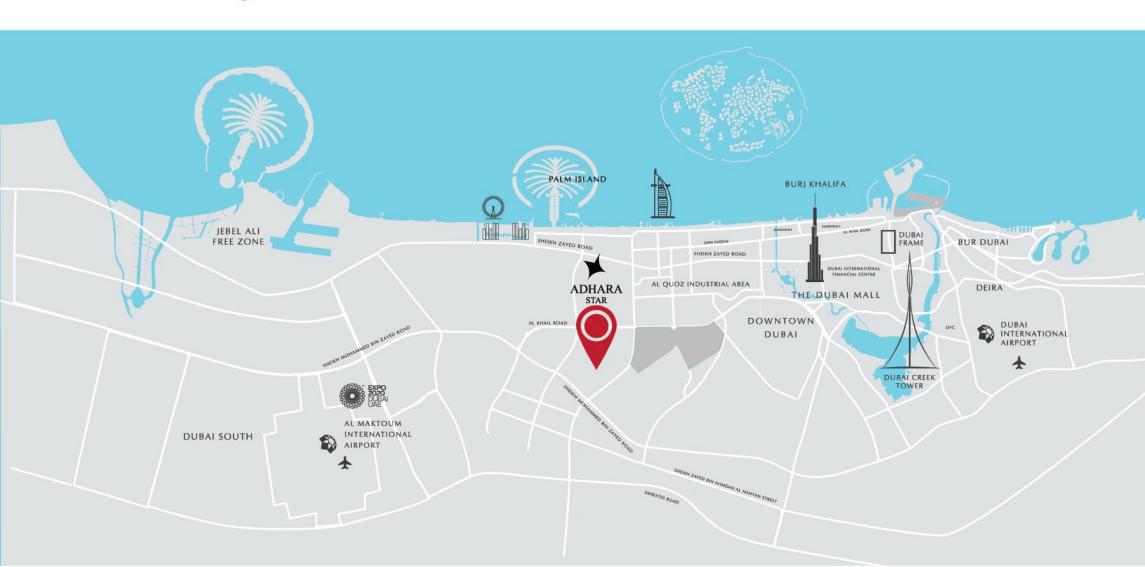

Part of the Dubai Land 'Megacity' project _____

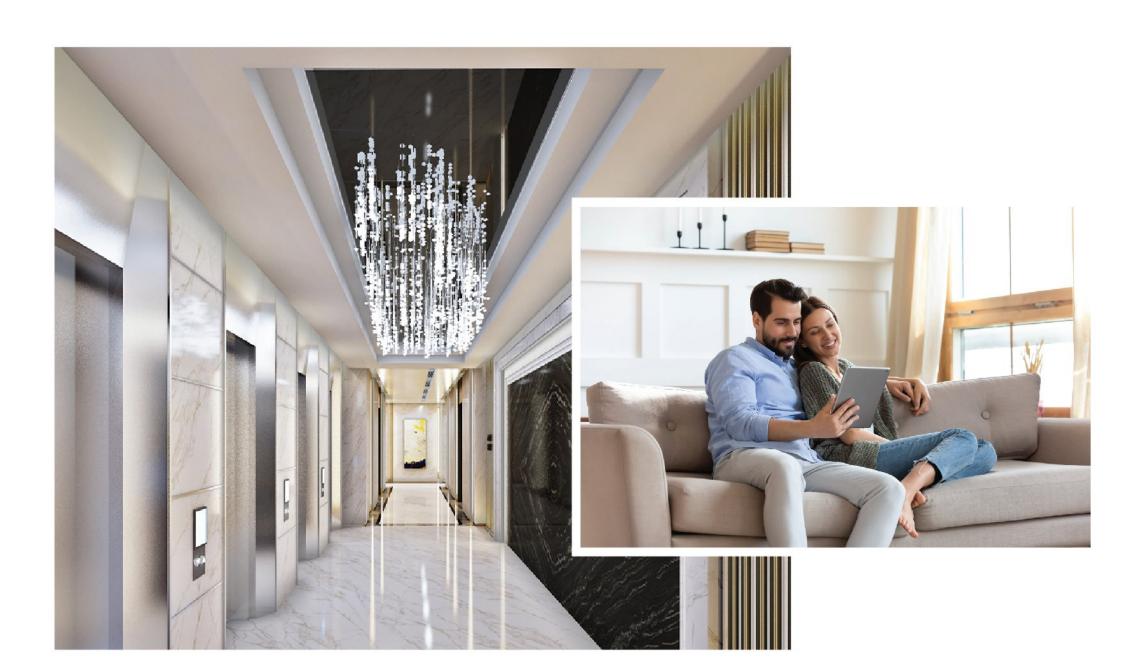

Situated at the intersection of Hessa Street & Umm Suqeim Road

Arjan is an primarily residential district located within the vibrant community of Dubai Land. It offers a unique blend of urban convenience and peaceful living, making it an ideal place to call home. The district is bordered by Al Barsha to the north and Sheikh Mohammad Bin Zayed Road to the south, providing easy access to the rest of Dubai. With its prime location, exceptional amenities, and emphasis on community, Arjan offers a lifestyle like no other in Dubai. Nearby landmarks include:
